

SUFYAN ALSAYEH

Cybersecurity Specialist

Dubai, UAE | sufyanalsayeh.sa@gmail.com | +971 55 992 2274 | linkedin.com/in/sufyan-alsayeh

PROFESSIONAL SUMMARY

Cybersecurity Specialist and RIT Dubai graduate with hands-on experience across offensive and defensive security domains. CompTIA Security+ (SY0-701) and eJPT certified, currently pursuing OSCP. Practical exposure to penetration testing, vulnerability assessment, threat detection, incident response, network security engineering, and compliance frameworks. Experienced with Fortinet enterprise solutions (NGFW, ZTNA, SOAR, FortiSIEM), Suricata IDS, and MITRE ATT&CK-based detection. Bilingual in English and Arabic with strong research, documentation, and stakeholder communication skills.

SKILLS & TOOLS

Offensive Security: Penetration testing (eJPT, OSCP in progress), Kali Linux, Metasploit, Burp Suite, Nmap, Maltego, Wireshark

Defensive & SOC: SIEM (FortiSIEM), SOAR, Suricata IDS, Sysmon, alert triage, IOC analysis, MITRE ATT&CK

Network Security: FortiGate NGFW, ZTNA, VPN, firewall administration, PfSense, network segmentation, IDS/IPS

Vulnerability Management: Vulnerability assessment, CVSS scoring, risk analysis (NIST SP 800-30), remediation tracking

Compliance & GRC: NIST RMF, OWASP Top 10, CIS Controls, GDPR, UAE PDPL

IT Operations & Endpoint Management: Microsoft 365, Entra ID (Azure AD), Intune (enrollment, automated app deployment, patch management), Bitdefender, network topology documentation and auditing

Programming & Scripting: Python, Java, Bash

Languages: English (Fluent), Arabic (Native)

PROFESSIONAL EXPERIENCE

IT & Information Management Intern

Jul 2026 – Present

The Hanging House | Internship | Dubai, UAE

- Support enterprise IT operations under the IT Head, spanning **Microsoft 365**, identity management, network infrastructure, and device compliance.
- Conducted network discovery audits to map all devices; organised, and labeled server racks, patch panels, and cabling; produced **network topology** documentation.
- Administer **Microsoft 365** and **Microsoft Entra ID (Azure AD)** users, groups, licenses, and access control policies.
- Configured **Intune** device enrollment with automated app deployment and patch management across Windows and Mac.
- Manage endpoint security (**Bitdefender**) and software licensing (**Adobe**) across company devices.
- Configured and maintain the biometric fingerprint attendance system.
- Organised file systems across **NAS** and **Box**; executed file migrations across **OneDrive/SharePoint** and on-premises storage.
- Maintained and refurbished office computers; built hardware and IT asset inventories for lifecycle tracking.
- Provided first-line IT support and documented IT processes and support resolutions.
- Supported desktop publishing (**DTP**) workflows for creative teams.

Cybersecurity Specialist

Jan 2026 – Jul 2026

Cryptocompliance.ai | Full-time | Dubai, UAE

- Monitored and enhanced security posture of internal systems and infrastructure.
- Conducted **vulnerability assessments**; supported **threat detection** and **incident response**.
- Implemented cybersecurity controls aligned with **NIST RMF** and compliance frameworks.
- Assisted with secure architecture design, risk assessments, and security policy documentation.
- Supported incident response including containment, analysis, and post-incident reporting.

System and Network Technical Intern

May 2025 – Aug 2025

Beta Information Technology | Internship | Dubai, UAE

- Configured, maintained, and troubleshoot enterprise-level **network** and **security** solutions for clients.
- Gained hands-on experience in system deployment, network optimisation, and security infrastructure management.

Systems Engineering Trainee

May 2024 – Aug 2024

Fortinet | Apprenticeship | Dubai, UAE

- Completed **Fortinet Certified Fundamentals (FCF)** training while supporting the systems engineering team.
- Worked with **FortiGate NGFW, ZTNA, and FortiSOAR**; contributed to secure network solution design.

Sales and Customer Relations Intern

Apr 2021

Al Futtaim Toyota | Internship | Dubai, UAE

- Managed customer engagement and sales pipeline; contributed to customer satisfaction and revenue growth.

EDUCATION

Bachelor of Science – Cybersecurity

Aug 2022 – Jan 2026

Rochester Institute of Technology (RIT Dubai) | Dubai, UAE

CERTIFICATIONS

- OSCP – PEN-200 Course Completed (Offensive Security) | Exam Pending
- eJPT – Junior Penetration Tester v2 (INE) | Aug 2025
- CompTIA Security+ ce (SY0-701) | Jan 2024 – Jan 2027
- Fortinet Certified Fundamentals in Cybersecurity (FCF) | Jun 2024
- NIST Risk Management Framework – Introductory Course v2.0 | May 2024

PROJECTS

Detection of Covert Communication Channels – Minecraft MASC (Suricata IDS)

Sep – Dec 2025

Designed a metadata-based detection methodology for the MASC covert channel; developed and validated custom Suricata IDS rules to detect covert activity using network traffic analysis without inspecting encrypted payloads.

IoT Attack Classification Using Machine Learning (SVM, KNN, Decision Trees)

Oct – Dec 2025

Comparative ML study on the CIC IoT-DIAD 2024 dataset; implemented and evaluated SVM, KNN, and Decision Tree classifiers for multi-class IoT cyberattack detection. SVM achieved highest classification accuracy.

Privacy-Preserving Federated Document Sharing Using Blockchain

Sep – Dec 2025

Designed a hybrid on-chain/off-chain architecture using zero-knowledge proofs (Polygon PrivadoID) to achieve GDPR and UAE PDPL compliant document verification with cryptographic right-to-erasure support.

AI Risk Management & Business Continuity Planning – Smart Warehouse Systems

Oct – Nov 2025

Developed a NIST SP 800-30 Risk Management Plan across seven IT domains including adversarial ML, insider threats, and AI misconfiguration. Designed BCP/DR strategies aligned to ISO 22301 and NIST SP 800-34.

Vulnerability Exploitation & Detection – CVE-2023-38831 (WinRAR RCE)

Sep – Nov 2024

Three-phase offensive security project: built a controlled VM lab to trigger the RCE exploit, deployed Sysmon for PowerShell and network event monitoring, and participated in cross-team red team/blue team exercises.

Wireless Network Penetration Testing – PfSense & Kali Linux Lab

Sep – Nov 2024

Simulated a misconfigured small-business wireless network using PfSense and Kali Linux. Introduced and exploited 6 vulnerabilities via MITM attacks, ARP spoofing, FTP exploitation, and data exfiltration in a red/blue team exercise.

Web Application Security Lab – SOP, CORS, CSP & Virtual Host Testing

Jan – Mar 2025

Configured Apache virtual hosts on XAMPP; performed DOM manipulation, AJAX GET/POST testing, and CORS/CSP policy analysis. Used Burp Suite for real-time HTTP traffic interception and security analysis.

Global Legal & Policy Frameworks for Generative AI

Oct – Nov 2024

Comparative analysis of AI governance across UAE, US, EU AI Act, UNESCO, Canada, China, and Brazil, covering data privacy, intellectual property, ethical AI risks, and cross-border regulatory enforcement.
